ABSTRACT

Topic: CAMPUS RECRUITMENT SYSTEM

Project Nature: Mini Project Extension

Completion Level:40%

Now a day's every college's placement cell suffer from the problem of maintaining data required for placement. The data is so large in amount and it becomes difficult for maintaining and using it. There is a need to maintain this data wisely. Today the tasks done for placement recruitment in college campus are all manually. And this task is very tedious. Lots of efforts need to be taken for carrying out this process. And there is a problem in maintaining the data as well. So we are proposing a system for Campus Recruitment   to do all this task automatically.

This system can be used as an application to manage student information to related placement.The system handles student as well as company data and efficiently displays all this data to respective sides. There will be no need of emailing every student about the company coming in college. The details of students and jobs can keep updated themselves through this software. The company can view all student's details and system can shortlist students according to their criteria instead of doing manually. There is admin login that can view and manage both students and company's account and also can put up notifications. Student can register online instead of going to placement department for registration. It will reduce the paper work and utilize the maximum capabilities of the setup and organization as well as it will save time and money which are spending in making reports and collecting data. It can be accessed throughout the organization with proper login provided. . Thus, we can say that new system is fully dynamic and requires less man power as compared to existing System.

Modules

- ➤ Admin
- ➤ Company
- ➤ Student

Admin

- Manage profile

- **Dashboard:** In this section, admin can see all detail in brief like Total Company Registered, Total User (Candidates) Registered

- Manage registered companies and Job seekers.

- View the listed Jobs of companies

- Short list students for jobs

- Upload placement materials

Company

- Company can register and login

- Update profile, change password.

- **Dashboard:** In this section, company can see all detail in brief like Total Number of applications received, Total number of new applications

- see the notifications of new applications received and recover the password.

- Dashboard contains total no.of applications received, total number of new applications.

- Manage job posting

- View Job seekers applications, Approve or Reject

- View Registered Students,remove Students

- Manage online test

- Manage Interview calls

- Send notifications about important dates of the recruitment to job seeker to the job seeker's notification bar as well as e-mail.

Student

- Jobseekers can register and login

- View profile, update profile and change password

- See the latest jobs posted on the home page

- Search jobs by Job category

- Apply for the job

- View the history of applied jobs and the responses of the companies.

- View Notifications from the company
